About this dataset

This data report forms part of a series of publications from SafeLives' Insights dataset. It contains 771 unique individual cases at intake and 430 matched cases at exit, drawn from 5 sexual violence services across England and Wales which used the SafeLives Insights outcome measurement service between April 2018 and March 2019.

In 2017, Insights underwent a redevelopment process and was replaced with an online portal. Owing to the change and the new indicators, this year's datasets are presented without previous year comparisons.

SafeLives runs the largest national database of domestic abuse cases in the UK. Our Insights database has records of more than 75,000 unique cases of adults experiencing domestic abuse from 2009 to date, and a further 4,000 unique cases of children in domestic abuse households from 2011 to date. These datasets give us an unparalleled overview of the national picture of domestic abuse.

We hope that everyone working to stop domestic abuse will be able to use this data to improve their services so that victims and families get the right help sooner.

At a glance

5 services

771 cases opened

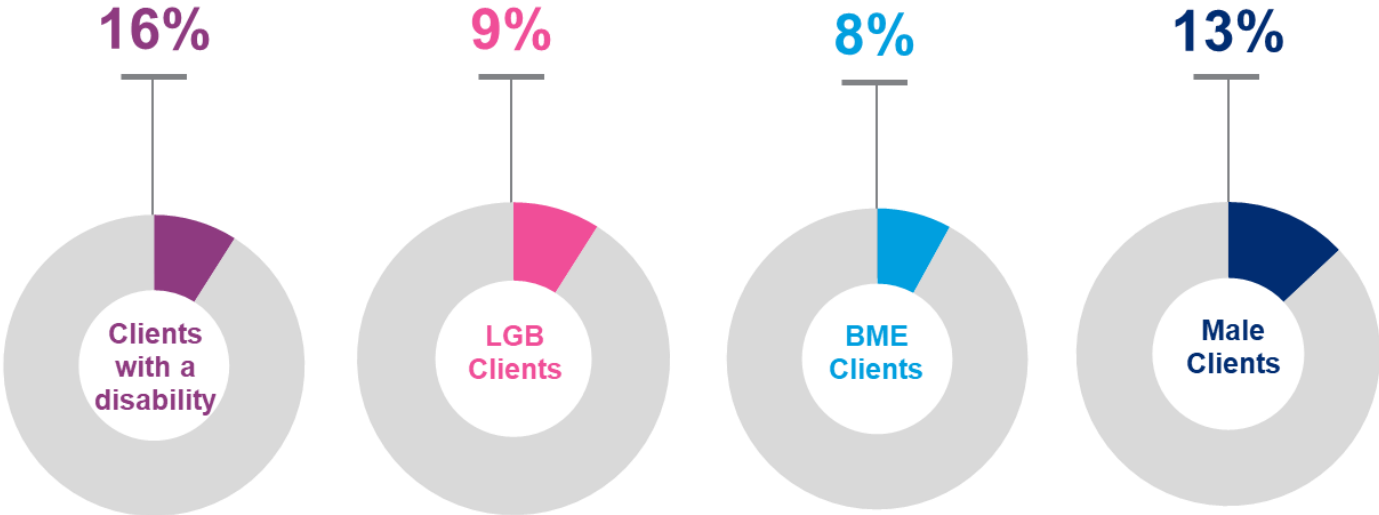

430 cases closed

136 clients supported with criminal justice

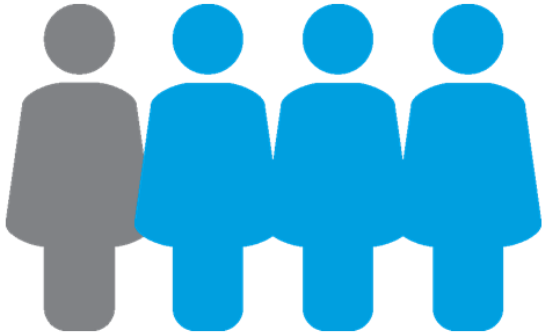

Location of the services in the dataset

Proportion of clients from diverse client groups

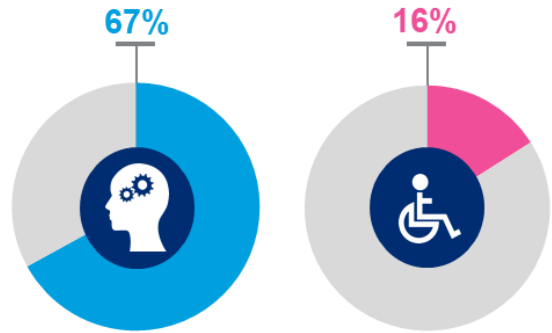

Key findings

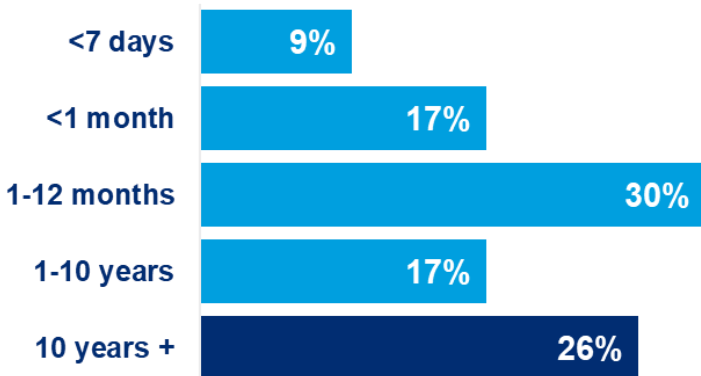

One in four (24%) victims were under the age of 18

Two-thirds of clients had mental health needs, and 16% had a disability.

Of those with a disability, 36% had a physical disability

For one-quarter of clients (26%) the incident had occurred more than 10 years ago

72% of children and young people were supported with safety

They accessed safety plans (60%), guidance and advice (59%) and support with the criminal justice system (56%)

32% of clients were supported through the criminal justice process, primarily with:

- Trial proceedings (23%)
- Liaising with witness care (19%)
- Completing impact statements (11%)

Around one in five clients required emergency medical intervention at intake

Service inputs

Cases used in the analysis

Intake forms	771
--------------	-----

In the period April 2018 to March 2019, caseworkers submitted 771 intake forms for clients entering sexual violence services.

These forms contain information about client demographics, and the characteristics of the abuse that clients accessing sexual violence services are experiencing.

Exit forms	430
------------	-----

Caseworkers submitted 430 exit forms for clients leaving sexual violence services for the period April 2018 to March 2019.

These forms were then matched to their corresponding intake form to provide a picture of client outcomes at the point of exit compared to intake. They also contain information about what interventions the client accessed.

Intake dates may occur prior to the period April 2018 to March 2019.

Criminal justice forms	136
------------------------	-----

Caseworkers supported 136 clients with criminal justice for the period April 2018 to March 2019.

These forms provide information on the outcomes of any criminal justice interventions at exit, as well as support provided by caseworkers during the criminal justice process.

Referral status	n= 771	
	Count	%
New client	737	96%
Repeat to service	28	3.6%
Continuing case	6	0.78%
Total	771	

Cases are deemed repeats if the client has returned to the service after their case was previously closed (or made inactive). Cases are marked as a 'Continuing case' if the case was transferred from the previous version of Insights to the new version.

Client outcomes

Outcomes and profile of abuse at exit (Information captured at exit, n=430)

The following is an analysis of cases where an exit form was completed during the reporting period. Cases have been matched with their corresponding intake forms, and intake data here relates only to the cases which also have exit data, so will vary from the number of cases in the intake dataset.

Since intake (or review point), has further abuse occurred?	n=	430
	Count	%
Yes, sexual abuse	5	1.2%
Yes, domestic abuse	6	1.4%
No abuse experienced since intake / review	392	91%
Missing	27	6.3%
